

Lesson 4 Assignment Instructions

1. Open your text editor.
2. Create a new file.
3. At the top of your new file, type the HTML5 Doctype Declaration: `<!DOCTYPE html>`
4. Below the doctype, type the opening and closing HTML tags: `<html>` and `</html>`
5. Within the HTML tags, create a `head` section with opening and closing tags: `<head>` and `</head>`
6. Within the `head` tags, set the title of your webpage by typing: `<title>Hello World, </title>`
7. After the `head` section, still within the HTML tags, create a `body` section with opening and closing tags: `<body>` and `</body>`
8. Inside the `body` tags, write "Hello World! I'm YOUR NAME" by typing: `<h1>Hello World, I'm YOURNAME</h1>`
9. Save your file with a `.html` extension, for instance, you could name it `hello_world_LASTNAME.html`.

The complete HTML5 file will look like this:

```
<!DOCTYPE html>

<html>

  <head>

    <title>Hello World</title>

  </head>

  <body>

    <h1>Hello World, I'm YOURNAME</h1>

  </body>

</html>
```
